HOT Topics in HOT Trauma:
Acute Pediatric Skeletal Trauma

Tuesday, November 15, 2016
5:15 pm PT, 6:15 pm MT, 7:15 pm CT, 8:15 pm ET

Webinar Directors

Donald S. Bae, MD
Dr. Bae is Associate Professor of Orthopaedic Surgery at Harvard Medical School and Attending Surgeon at Boston Children’s Hospital. His clinical and research interests focus on congenital, traumatic, neuromuscular, and sports-related conditions of the hand and upper limb in children. He serves on the Harvard residency program’s Education Committee and is Co-Director of the Harvard Hand and Upper Extremity Fellowship. Dr. Bae also leads the orthopaedic simulation curriculum at Boston Children’s Hospital.

Pablo Castañeda, MD
Dr. Castañeda is Chief of the Division of Pediatric Orthopedic Surgery at NYU / The Hospital for Joint Diseases Department of Orthopedic Surgery in New York. His practice focuses on improving outcomes for children with musculoskeletal conditions, including developmental dysplasia of the hip, slipped capital femoral epiphysis, Legg-Calvé-Perthes Disease and has a keen interest in fractures and musculoskeletal infections. He serves on the Medical Advisory Board of the International Hip Dysplasia Institute and on the Board of the Mexican College of Orthopedics.
